university. A highly practical guide and motivational read, Reflections will help every teacher and leader feel more confident in weaving thinking tools into everyday learning to create their thinking classroom. Everything in this book was forged and tested in the classroom. It is a book about teaching, by teachers, for teachers. It is designed to encourage passion for

teaching with an eye on that all-important ingredient called FUN! Reflections shares Eric's favourite thinking tools with step-by-step guides to apply them to any classroom task and environment, no matter the subject, year level or student proficiency. Reflections also shares Eric's classroom observations and advice for motivated educators, taken from his experience over 25 years working as an

educational consultant in classrooms, staff rooms and workshop settings across Australia and New Zealand. Prior to his consultancy work, Eric worked as a history teacher and then deputy principal over 20 years. Eric's Thinking Skills Framework is at the heart of his work, and in this book he shares how vital this structure is for explicit teaching and for enabling students to be proactive,

<p>independent and vibrant thinkers. Eric will show you how to embrace this Thinking Skills Framework and make it the core of your lessons. This Framework will not only help you as an educator simplify your lesson planning and assessment design, but also help your students to understand the structure of thinking (from foundation to higher-order thinking) and teach them to know when,</p>	<p>how and why to tackle a task using the appropriate thinking tools. <u>Popular Mechanics</u> Lulu.com Lists all the resources needed to create a balanced curriculum for homeschooling--from preschool to high school level <u>Monographic Series</u> CreateSpace "Citizen Soldier Handbook: 101 Ways for Every American to Fight Terrorism" is a How-To Guide for Americans</p>	<p>to fight the greatest threat to Western Civilization - Radical Islam.
