This dictionary is testimony to the dynamic nature of the transportation and logistics field. The field continues to grow and evolve into an increasing myriad of orientations. This work stems back to the middle 1970s with the first edition by Wallace I. Little (1921 - 1977). The second edition in 1982 contained over five hundred additions and nearly sixty major alterations. This third edition contains over three hundred additional entries as well as major

alterations to over fifty of them.

Transportation continues to change into a market driven industry. The user side reflects market- and management-driven emphases that would have been labeled as pure fiction just a decade ago. Some of these changes are:

- Deregulation
- Purchasing evolving closer to logistics and having greater roles in with traffic
- Logistics having close association with production, scheduling, and related areas
- Computers and electronic links becoming major parts of the traffic/transportation/purchasing landscape
- Greater international corporate orientations
- Need for logistics flexibility regarding pro-action in

the face of energy, interest cost, inflation, international competition, and other major environmental forces • Increased roles of non-economic regulations and policies In addition to the changes in the transport-traffic management interface, the shipper side of the world has extended to be linked with such titles and functions as materials, distribution, warehousing, inventory, customer service, order entry, planning, production scheduling, and in many cases purchasing. This dictionary is a document that will continue to grow.

International Trade Administration Export and Import Management is a well researched student friendly book that proposes to fill the gap between theory and practice for young managers aspiring for challenging positions in international business. The book is a pioneering effort in this area where only manuals or replicas of manuals have ruled for years. Written in essentially textbook fashion, the book

presents interesting forays into the exciting world of export and import. The book is divided into 16 comprehensive chapters that take the reader through a sequential journey in export-import management. The students will be exposed to conceptual framework, procedural detail and practical aspects of international transactions.

Interesting examples, cases and illustrations with reference to details make it full of life. Each chapter lists its objectives in the beginning and presents practical exercises at the end. The students will be able to relate their progress to the listed goals easily. Practical exercises will encourage them to go to the field as well as

search the internet for more information. The unique feature of the book is a complimentary CD that contains all the relevant export-import forms for practical learning. The book has been planned keeping in view the needs of the students of MBA/PGDM/PGDBM/MIB and other international business courses at PG/UG level. It will also prove to be a good resource for faculty members.
